

RULEBOOK

ByteVerse

TIMELINE

Registration Starts	29th March 2025
Info Session	5th April 2025(online)
Registration Ends	11th April 2025 23:59 IST
Hackathon Starts	12th April 2025 10:00 IST
Mid Evaluation	12th April 2025 22:00 IST
Hackathon Ends	13th April 2025 16:00 IST
Results Announcement	15th May 2025

THEMES

- Quality Education
- Food Quality and Hunger
- Cybersecurity
- Healthcare and Medical
- Finance
- Sustainable Technology
- Law and Justice
- Community Building
- Disaster Management
- Space and Astrophysics Technology
- Open Innovation

TRACKS

- Web Development
- App development
- Artificial Intelligence
- Web3 – Blockchain

TERMS & CONDITIONS OF PARTICIPATION

DATE & DURATION:

- The 30-hour hackathon is slated to be live dated 12th April 2025 to 13th April 2025.

REGISTRATION:

- Registrations start from March 29th, 2025.
- There is no registration fee mandatory for participation in the hackathon.
- Registrations to participate will proceed through Unstop.

PARTICIPATION:

- The competition is open for teams comprising students currently enrolled at any educational institution pursuing a College Degree.
- Participants can participate solo or in a group consisting of a maximum of 4 members.
- Participants are allowed to form a team with members coming from multiple educational institutions.
- Teams should be made up exclusively of members, NOT organizers, mentors, judges, or any other corresponding privileged positions at the hackathon.

TERMS & CONDITIONS OF PARTICIPATION

HACKATHON:

The hackathon will be conducted entirely online.

- A mid-evaluation will take place 12 hours after the hackathon begins.
- **Mid-Evaluation Requirements:**
 - GitHub Repository: A complete repository link must be shared, including a properly documented README file.
 - Presentation: All teams shall submit a PPT in the same format as provided, adhering to the guidelines with respect to their project.
 - Prototype (Optional): A working prototype demonstrating the project's feasibility must be submitted.

TERMS & CONDITIONS OF PARTICIPATION

- **End Evaluation:**

- **Submission Deadline:** Projects must be submitted within the 30 hour time limit; late submissions will not be accepted.
- **Source Code:** Provide a link to a public GitHub repository containing your project's complete source code.
- **Documentation:** Include a comprehensive README file detailing the project's purpose, setup instructions, and usage guidelines.
- **Project Prototype:** Submit a fully functional project or, at a minimum, a working prototype demonstrating core features.
- **A video demonstration** explaining your project and key features.

- **Communication and Discord:**

- It is mandatory for each member of a team to join the [ByteVerse Discord Server](#) before the hackathon starts. Also, every member must change their server nickname to their official name.

TERMS & CONDITIONS OF PARTICIPATION

- It is mandatory for each team to open a Support ticket on the ByteVerse Discord Server and get their dedicated private team channel. Failing to do so will lead to the cancellation of participation of the team from the event.
- All the announcements about the event will be made on the ByteVerse Discord server. Hereby, it is advisable to keep your notifications on for the server and be active to not miss out on any important announcements.
- Teams can seek help/support from the organizers via the public channel or their private channel.
- No participant should personally contact or relay a direct message to any of the organizers, mentors, or judges. Failing to comply with the same, shall lead to immediate and unobjectionable disqualification.

TERMS & CONDITIONS OF PARTICIPATION

ByteVerse Code of Conduct :

- On participation in the event, the participants of ByteVerse, must agree with the HackSlash Community Guidelines and Code of Conduct as well as further abide by all the terms and conditions of the event.
- Participants are expected to treat all participants, mentors, judges, organizers, etc., with utmost respect and, in coherence to abiding by the HackSlash Community Guidelines and Code of Conduct.
- Teams can be disqualified from the event at the organisers' discretion. Reasons might include, but are not limited to, violating the rules of the event, behaving in a way that violates the HackSlash Community Guidelines and Code of Conduct or any other unsporting behaviour.
- The violation of any terms and conditions by any member of a team will lead to the cancellation of the participation of the entire team from ByteVerse. The decision on the part of the organizers shall be final and binding. No further queries in this regard will be entertained.
- The organising team reserves the right to change or modify any of the terms and conditions of the event at any point in time. Your agreement to comply with the terms and conditions of the event will be deemed agreement to any changes to it.

TERMS & CONDITIONS OF THE PROJECT

- It is compulsory for each team to first select AT LEAST one track and then decide on the corresponding theme(s) to go with the same. The work on a project MUST strictly be done within the 30-hour duration of the hackathon.
- Teams can use libraries, frameworks, or open-source code to implement in their projects.
- Working on a project before the event and open-sourcing it for the sole purpose of using the code during the event is strictly against the spirit of the rules and is not allowed.
- We encourage you to submit projects only prepared during the duration of the hackathon. However, if you decide to submit projects consisting of re-used code segments, or re-submit a project that you have already submitted previously to any other hackathon, you are to disclose information about such previous use and its extent with the submission.
- If upon inspection, it is found that the project has reused code that was not disclosed with the submission, the organizer may ask the participant to point out similarities and differences between the old and new work, and/or disqualify the submission from winning awards automatically.
- Any kind of plagiarism or any explicit content in the hack shall not be entertained at any cost and the submission will be automatically disqualified. This decision shall be final and binding. No further queries in this regard will be entertained.
- Maintain honesty and transparency in project development, adhering to the spirit of fair competition.

SUBMISSION GUIDELINES

REPOSITORY

- The GitHub repository must be freshly created after the hackathon starts and should be the same as the Mid-evaluation.
- The GitHub repository of the project must be Public.
- Commit all project code and resources in an organized manner.
- Maintain a clear folder structure for easy navigation.
- If applicable, include executables (e.g., APKs, JARs) in the repository.
- The repository and prototype should be a continuation of the mid-evaluation submission, ensuring steady progress.

README FILES

- The README file must contain the links to the Presentation and Video pitch at the top.
- Add the relevant deployment links, if any, in the README file.
- Mention setup instructions, if any, needed to run the project in the README file.
- The README file must list all the dependencies of the project.
- The README file must contain a clear description of the workings of the hack.

SUBMISSION GUIDELINES

PITCHING

- Teams must record and submit a video pitch:
 - Final Working Video (for end submission, showing the completed project).
- Teams are strongly encouraged to present a demonstration of what they have built even if their hack is broken or they weren't able to finish the same.
- Video length should not be less than 3 minutes and should not exceed 10 minutes.

JUDGING CRITERIA

Innovative Idea:

- Uniqueness and originality of the concept or idea.
- How well the idea addresses the challenge identified by the team? The potential impact of the solution?

Functionality:

- The effectiveness and reliability of the solution.
- The completeness and reliability of the prototype or final product.

User Experience(UX):

- Intuitiveness and ease of use for end-users.
- Thoughtful design and user interface.

Technical Complexity & Implementation:

- Technical challenges overcome.
- The depth and sophistication of the technology used.

Code Quality:

- Cleanliness, organization, and readability of the code.
- Effective use of coding best practices.

JUDGING CRITERIA

Demonstration:

- A compelling demonstration of the solution.
- The ability to showcase key features and functionalities.

Pitch:

- Clarity and effectiveness of the presentation.
- Ability to communicate the problem, solution, and value proposition.

Collaboration:

- Teamwork and collaboration among team members.
- Integration of diverse skills and expertise.

Scalability:

- The potential for the solution to scale to handle increased data, users, or usage.

Adaptability:

- The flexibility of the solution to adapt to future changes or enhancements.

JUDGING CRITERIA

Feasibility:

- Realistic and practical implementation within given constraints.
- Consideration of potential challenges and mitigation strategies

Impact and Social Relevance:

- The potential positive impact on users, communities, or society.
- Addressing a real-world problem or need.

Judges' Impression:

- Overall impression of the judges based on the team's passion, dedication, and effort through the mid-evaluation.

Technical Complexity & Implementation:

- Technical challenges overcome.
- The depth and sophistication of the technology used.
-

Mid – Evaluation:

- The mid-evaluation will specifically assess the progress made during the first half of the hackathon.
- Judges will evaluate the completion of tasks, the quality of code, and overall advancement in the project up to the midpoint.

JUDGING CRITERIA

- Teams are expected to demonstrate substantial advancement in their project by the mid-evaluation.
- 30% weightage will be allotted for the mid-evaluation.

Details about Evaluations:

(Mid Evaluation)

- A GitHub repository showcasing meaningful commits.
- Powerpoint presentation in the given format.
- An optional working prototype demonstrating core functionality.

(End Evaluation)

- Teams must provide a public GitHub repository containing the complete source code of their project.
- A comprehensive README file must be included, detailing the project's purpose, setup instructions, and usage guidelines.
- Submissions must include a fully functional project or, at a minimum, a working prototype demonstrating core features.
- A video demonstration explaining your project and key features.

TERMS & CONDITIONS ON PRIZES

- Awards will be presented to the top three teams, regardless of team size.
- Special Recognition: The top “All-1st year team”, consisting solely of first year members, will be awarded a momentous prize, regardless of their overall position.
(Note: The prize will be awarded only if at least ten all-1st-year teams submit their projects in the hackathon)
- There are no theme-specific or track-specific prizes.
- Participation certificates will be distributed at least 30 days after the declaration of the hackathon result.
- Prizes will be disbursed at least 30 days after the declaration of the hackathon result.
